

# FG VALVOLE SUSTAINABLE POLICY

*“Nature is critical to our survival: nature provides us with our oxygen, regulates our weather patterns, pollinates our crops, produces our food, feed and fibre. But it is under increasing stress.”*  
UN SUSTAINABLE DEVELOPMENT GOALS

# MAIN OBJECTIVES:

- ▶ PLASTIC FREE
- ▶ RENEWABLE ENERGIES
- ▶ NEARLY ZERO ENERGY BUILDING
- ▶ TOWARDS ELECTRIC VEICHLES
- ▶ GREEN AREA

# PLASTIC FREE

- ▶ Encouraging the use of water bottle among company's employees in order to reduce plastic consumption.

# RENEWABLE ENERGIES

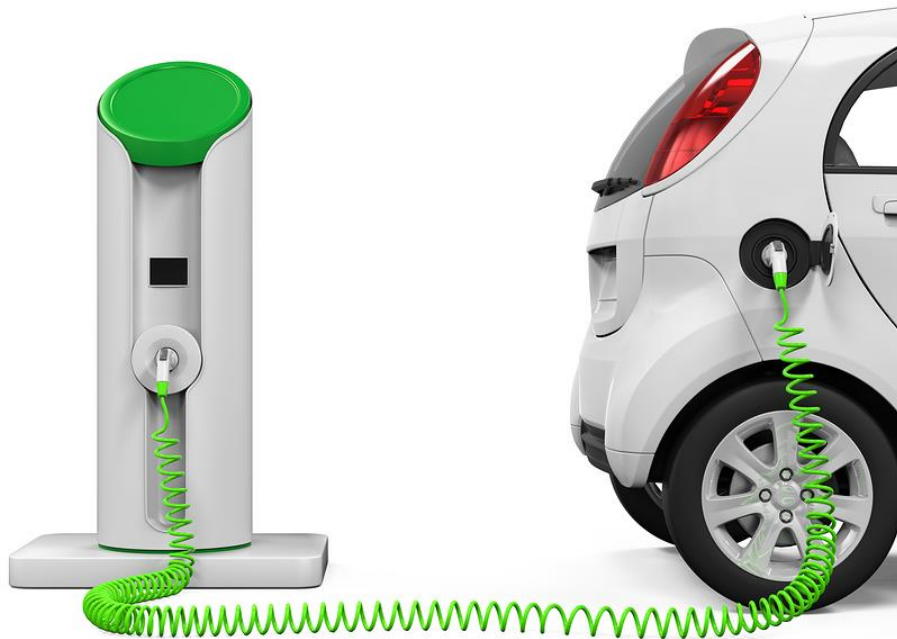

- ▶ The company is planning to double the size of the current facility and implementing the use of renewable energy by introducing a photovoltaic system with a total capacity up to 127 kWp.

# NEARLY ZERO ENERGY BUILDING

- ▶ The enlarged facility will be a «Nearly Zero Energy Building» considering the technical requirements planned for its realization.

# TOWARDS ELECTRIC VEICHLES

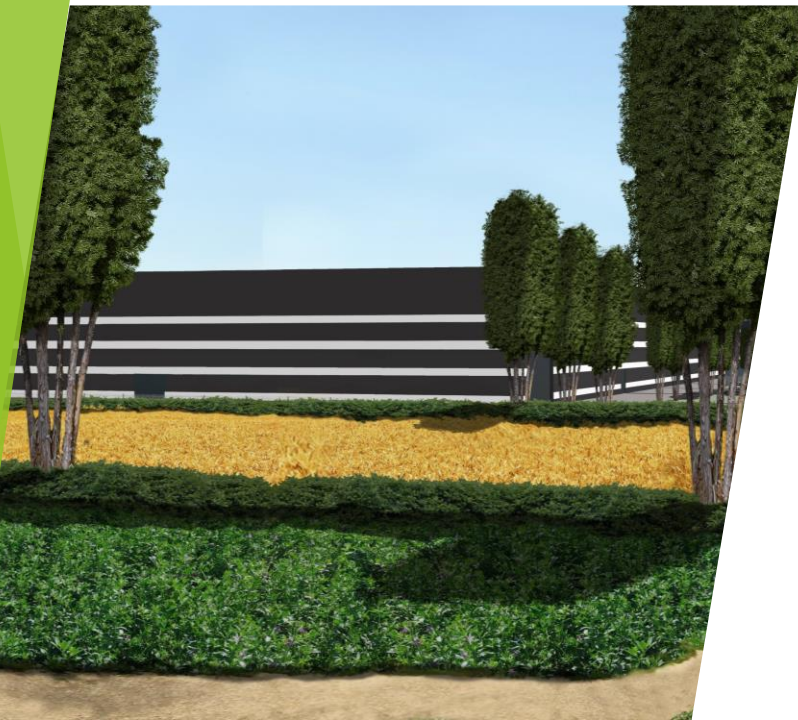

- ▶ The company is making important steps towards the introduction of electric veichles. The plan is to have 100% electric veichles within 2026.

# GREEN AREA

▶ The expanded facility will be surrounded by a green area approximately of 15.000 sqm including:

- An agricultural terrace;
- Running path for employees.

The cultivation of the areas is also a reason to demonstrate the possibility of coexistence between different functions (agriculture and industry).
